

Page 13, line 14, change "3-hydrozinopropyl" to read
-- 3-hydrazinopyrpyl --.

Deletion of page 8 and 9 subject matter according to the present amendment corrects inadvertent error with respect to identification of "secondary alkylated product" having a "m.p. 210-212°C (dec.)" referred to at page 9, lines 5-8, of the specification. Said amendments do not materially or significantly affect the claimed subject matter or disclosure related thereto and entry thereof is respectfully requested. For the record, the "secondary alkylated product" having a melting point of 210-212°C. is thought to be the "4-alkylated" product below.

The page 13 amendment corrects a typographical error.

Respectfully submitted,

DAVIS L. TEMPLE, JR.
WALTER G. LOBECK, JR.
